ALOPECIA AREATA

“This is a client of mine that was diagnosed with Alopecia Areata approximately 12 months ago. The before photo is before starting the Hair Serum. Second photo is from 6 weeks. The final photo was taken 3 months later after daily application of the NeoGenesis Hair Thickening Serum.” – Marisa Parr

ANAGEN EFFLUVIUM (CHEMO)

"I experienced hair loss during chemo. I had extreme thinning and bald spots and imagined it would be months and months before it would fill back in.

I started cold capping and using NeoGenesis Hair Thickening Serum twice a day.

My husband can't believe my hair has grown back so fast, and neither can I. My hair is thicker than before and regaining length. I do not have any thinning or bald spots anymore.

Really happy!" - MMZ

TRACTION ALOPECIA

"PD has traction alopecia which is caused from some hair styles pulling too tight and causing tension on the scalp and inflammation to the hair follicle. It usually starts at the front hairline and can cause the hairline to thin out. I started her on NeoGenesis Hair Thickening Serum twice a day for the first 30 days, then once a day. We started seeing new growth in the first month. By the end of the second month, we noticed some areas of concern were filling in. Each month showed improvement. PD has been happy with the product and results so far. We have been able to get some of her hair loss under control at this time." - Sophia Emmanuel, Crown Worthy Trichology

FRONTAL FIBROSING ALOPECIA

"AE's hair loss has progressively gotten worse over time. Stress has most likely been a factor for the hair loss and getting older may also play a part in it. Her hair loss and thinning may be hereditary, as well. She has some scar tissue on the scalp from relaxing the hair, so some of the follicles are closed and she has some itchiness.

9 MONTHS

I started her on a treatment plan that included NeoGenesis Hair Thickening Serum, Laser Comb Therapy and supplements.

We started seeing new growth and less shedding within the first month. She started getting compliments after 2 months. Over time her hair has gotten healthier to the touch, and does not feel dry and brittle anymore. It has more density, and the rate of new growth has been steady. She is really pleased with the changes she sees in her hair growth." – Sophia Emmanuel, Crown Worthy Trichology

"I found this balding spot while brushing my hair. I had a lot of stress in my life, and feel it was probably caused by that. I had noticed on occasion that there were spots that were not growing, but not as bad as this one. I started on NeoGenesis Hair Thickening Serum twice a day for 30 days, and then once a day. The bald spot filled in nicely and I'm happy with the results!" - SP

HAIR LOSS + MICRONEEDLING

"Before starting the NeoGenesis Hair Thickening Serum there was a lot of hair shedding and she has noticed that has decreased. She had no new growth prior to using the products.

I started giving her microneedling treatments every 2 weeks in combination with the Hair Thickening Serum and her hair looks so much healthier. By the fifth month we really started to notice a difference. There was new hair growth everywhere and significant growth at the top of the temples.

By month 7, we saw improvement in thickness, texture and growth. She is using the serum once every other day and has stopped the microneedling. The treatment worked really well for her." - Annkei Ssharma – Shamin Skin Care

HAIR LOSS + JET TREATMENTS

"This is my daughter who started her hair journey 1 year ago.

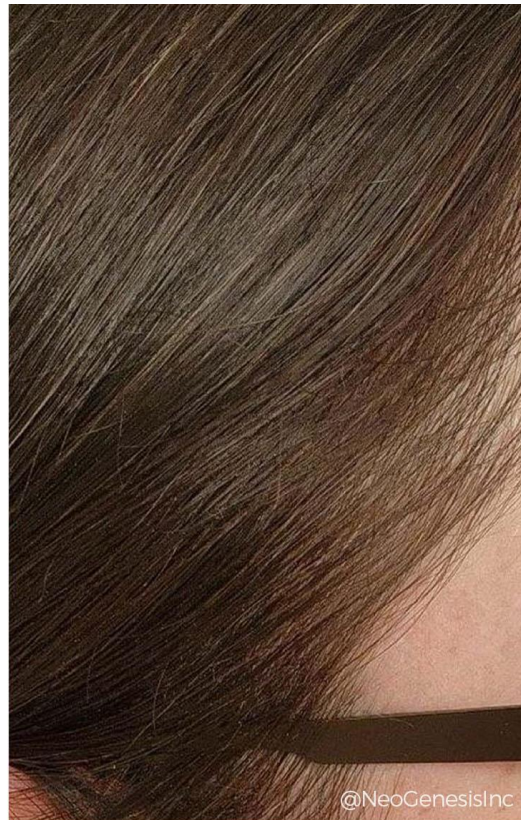

She has had approximately 16 Jet treatments in the past year and has only been using the NeoGenesis Hair Thickening Serum.

We are both blown away by her response, much thicker and her hair has also darkened up naturally.

I wish she had zoomed in on the first photo because her scalp was so bare....especially by her forehead." - SS

HAIR LOSS + MICROCHANNELING

"I started my client with 1 session of ProCell hair serum. Microchanneled at 0.5mm overlapping the entire top of the head. She had significant hair loss due to Covid 1 year ago, with no regrowth.

I didn't see any significant change after 1 month, so I switched her to NeoGenesis Hair Thickening Serum.

I used the same protocol to microchannel product into the scalp. I used 2 ml for the treatment and sent her home with the bottle of Hair Thickening Serum. She applied it at night into damp scalp and massaged in. I have done 4 treatments as of last week. I see her every 2 weeks. These before and after photos are after 2 treatments of NeoGenesis with take home product for 6 weeks. I will see her again next week. Just wanted to show you her progress."

ALOPECIA AREATA + ANDROGENETIC ALOPECIA

“This client has 2 different types of hair loss, alopecia areata on the back of her neck that goes up into the sides. Alopecia areata is an auto-immune related hair loss that can cause patchy hair loss or bands of hair loss. She also has some androgenetic alopecia that is a genetic predisposition. Her hair is very thin and she was considering hair transplants, as she didn't want to wear wigs.

She started on NeoGenesis Hair Thickening Serum and within a month we noticed less shedding, some additional thickness and some positive changes to the hair line. She used to use a fiber builder to cover her bald spots, but has stopped using that after 2 months because she felt like she doesn't need to use it anymore.

At 3 months, her shedding has reduced to almost none, her hair has had a lot of new growth on the nape and the temples, and the thickening has improved.

Each month shows more progress and she is really happy. Her friends are commenting and her hairdresser noticed how much thicker her hair is.” – Sophia Emmanuel

HAIR LOSS

"I have been losing my hair (very gradually) over the last 14 years, and after being turned down for a hair transplant, I decided to see a trichologist. She suggested (given the type of hair loss that I was experiencing) that I try the NeoGenesis Hair Thickening Serum.

I started the treatment and while I initially experienced additional shedding, I also noticed a visible improvement in my hair, with improved growth/hair quality around my hair line.

Following the success of the first treatment I decided to purchase a Theradome Pro Laser Helmet, as I read this could enhance the growth further, and 6 weeks after the initial treatment I started a second course of the serum.

Between October and April, the improvement was excellent, as my hair was much thicker/fuller." - TM

HAIR LOSS

"My client is 56 years old and starting to notice some hair loss. Each time he combed his hair he noticed some hair falling out. It has mostly fallen out in the front and back, so he started combing over to hide the thinning spots.

I started him on NeoGenesis Hair Thickening Serum and within 6 weeks his hair was stronger, he had less hair loss and it looked healthier.

As the months went by, he noticed more substance and his hair is getting fuller.

He is really happy and surprised with the results."

@NeoGenesisInc

“When I started this program (and you must be real with yourself) it took a bit of time. What helped me was taking pictures so I could see the real changes happening. I was shocked at every interval; I was surprised to see the gap was closing. Each month my hair had friends on top and on the sides of my head to share space with. It was real hair! It was my hair! I could not believe what was happening, because I had seen things grow, but fall out even while doing the other treatments. I can now part my hair in the middle, and I have a regular part. A part in the middle of my head was not feasible a while back, and to see this now was quite amazing. I do not have fall out, and my scalp never itches.

The only thing I have been doing is staying true to the process, and that is just the beginning. I know the rules; do what the directions say, and things will happen. It works!” – PP

SEBORRHEIC DERMATITIS

“Client has chronic issues with seborrheic dermatitis and rosacea. Her triggers include stress and certain types of food. Her skin develops pustules and areas of redness and becomes flaky and itchy.

She is now using the Recovery serum when the itch gets really bad and it relieves it. She loves the Barrier Renewal Cream, as it is soothing and really helps with the dry skin.” – LK

SEBORRHEIC DERMATITIS

"I had seborrheic dermatitis on different areas of my body. It was primarily under the eyes and near my nose, and I got some patches on my forehead and eyebrows. It also spread to my chest and finger.

I was put on a steroid medication that worked for a very short time and then another cream that did not help the issue.

My sister and my cousin introduced me to NeoGenesis. I started using NeoGenesis Cleanser, Recovery and Moisturizing Mist. After just 3 months, I have none of the symptoms I had before and no itching. My skin feels awesome and moisturized. I get compliments on it too, to be honest with you. It's something else, it really is. It's unbelievable how effective the products are." – NC

HAIR LOSS

DAY 0

6 MONTHS

"My client was dealing with significant hair loss due to surgery and anesthesia. Clumps of hair were falling out, and her hair was thinning rapidly. I sent her home with NeoGenesis Hair Thickening Serum with instructions to use twice daily for the first 30 days and once a day after. After about 3 1/2 months, her hairdresser mentioned that the Hair Thickening Serum was working for her, and said that her hair had been coming out in handfuls before but the last time it was just one hair.

We could see a lot of new hair growth. At the 6-month mark, the hair around the crown was starting to get fuzzy and poofy because there is so much new growth. Her hair is no longer brittle, and is feeling very soft and smooth. The shedding has completely stopped, and her hair is coming in nicely. There is 3-4 inches of new growth and it is much thicker on the scalp. My client and I are so pleased!"
